

# GOODS DIGITAL PASSPORT

Blockchain-Based Proof Of:

Origin

Authenticity

Ownership

# The Counterfeit Problem

The black market for stolen and counterfeit goods costs producers and consumers over 4 trillion a year as well as causing untold harm to brands and fuelling crime. All because of a lack of information – blockchain technology means that its possible to track the history of all products at low cost meaning no one will ever have to buy a counterfeit or stolen product again.

This creates many issues for :

## Consumers

- Bad Quality
- Lack of Safety
- Loss of Reselling Value

## Brands

- IP Infringement
- Reputation Damage
- Loss of Sales

## Governments

- Criminal
- Sustainability
- Loss of Tax and Duties

## Insurers

- Riskier Products
- Risk of False Claim
- Risk of Inaccurate Value

# Our Blockchain Based Solution

---

All goods and genuine items can be easily tagged on the blockchain. Everyone from consumers & brands, to insurers & governments can quickly check & verify the origin, authenticity & ownership of goods.

Origin

Authenticity

Ownership

## Consumers

- Verify Authenticity
- Establish Ownership
- Declare Loss / Theft
- Transfer Ownership

## Brands

- Protect IP
- Preserve Reputation
- Increase Value
- Improve Customer Experience and Retention

## Governments

- Lower Criminal Financing
- Increase Sustainability
- Increase Tax and Duties vs. Counterfeit

## Insurers

- Authenticity proof
- Ownership Proof
- Enable Smart Contract

# Market Size

---

Global counterfeit market

2015 **\$1.7 Trillion**

2022 **\$2.3 Trillion**

Counterfeit share of global goods market

Total cost of counterfeiting including social impact, investment & criminal enforcement costs:

**\$4.2 Trillion**

Money spent on anti-counterfeiting packaging by manufacturers:

2015 **\$82 Billion**

2020 **\$153 Billion**

And this is an inefficient solution

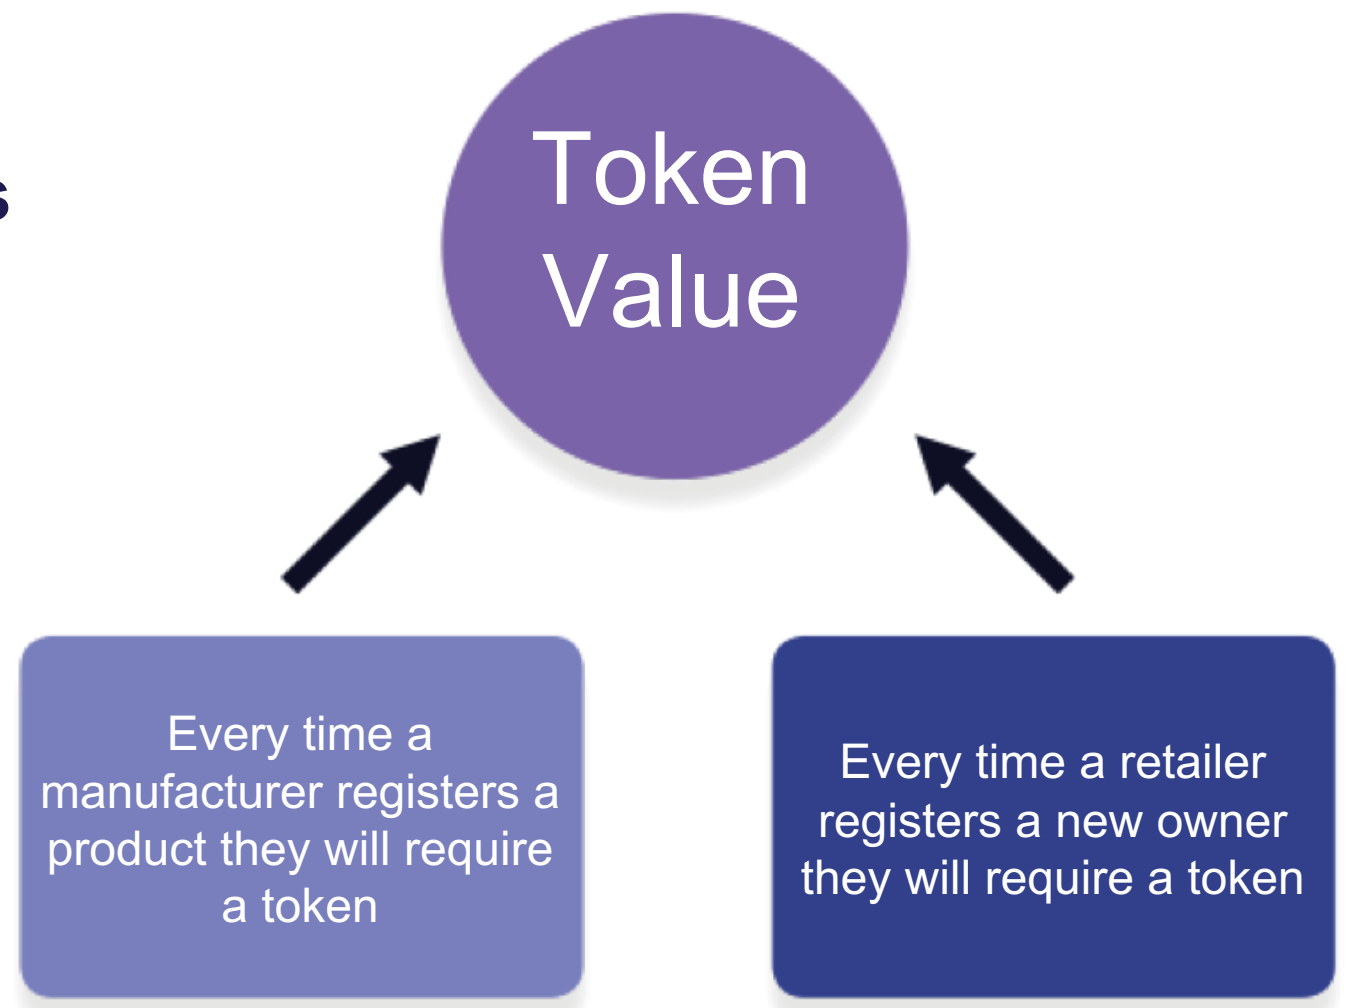

# Business Model

---

## How the Business Model Works

Brands & users can purchase a token to register goods on the blockchain.

With the limited token supply, our tokens will gain value with the adoption and usage of our eco-system – and so will our ICO participants.

# Anti Counterfeit Competition

Existing anti-counterfeiting solutions mostly consist on packaging improvements.

**However they are not efficient enough:**

- Counterfeiters also copy these packaging update
- The anti-counterfeiting solutions disappear with the packaging
- These improvements are brand specific and not inter-operable, universal for mass adoption
- These anti-counterfeiting solutions can't be updated

Technology	Format	Limitations
Hologram	Label	Can be easily copied
RFID	Chip & Reader	Privacy concerns, High item-level cost
Ink & Synthetic Markers	Ink & Reader	Cartons may not be retained
Serial Identification	Inscription Motif & Reader	Optical markings can be copied. Central database / non inter-operable
Bar Codes	Tag & Reader	Track-n-trace solution can be copied

# How We Are Different

---

## Better

---

- ✓ Accurate
- ✓ Tamper-Proof
- ✓ Copy-Proof
- ✓ Always Up-to-Date

## Cheaper

---

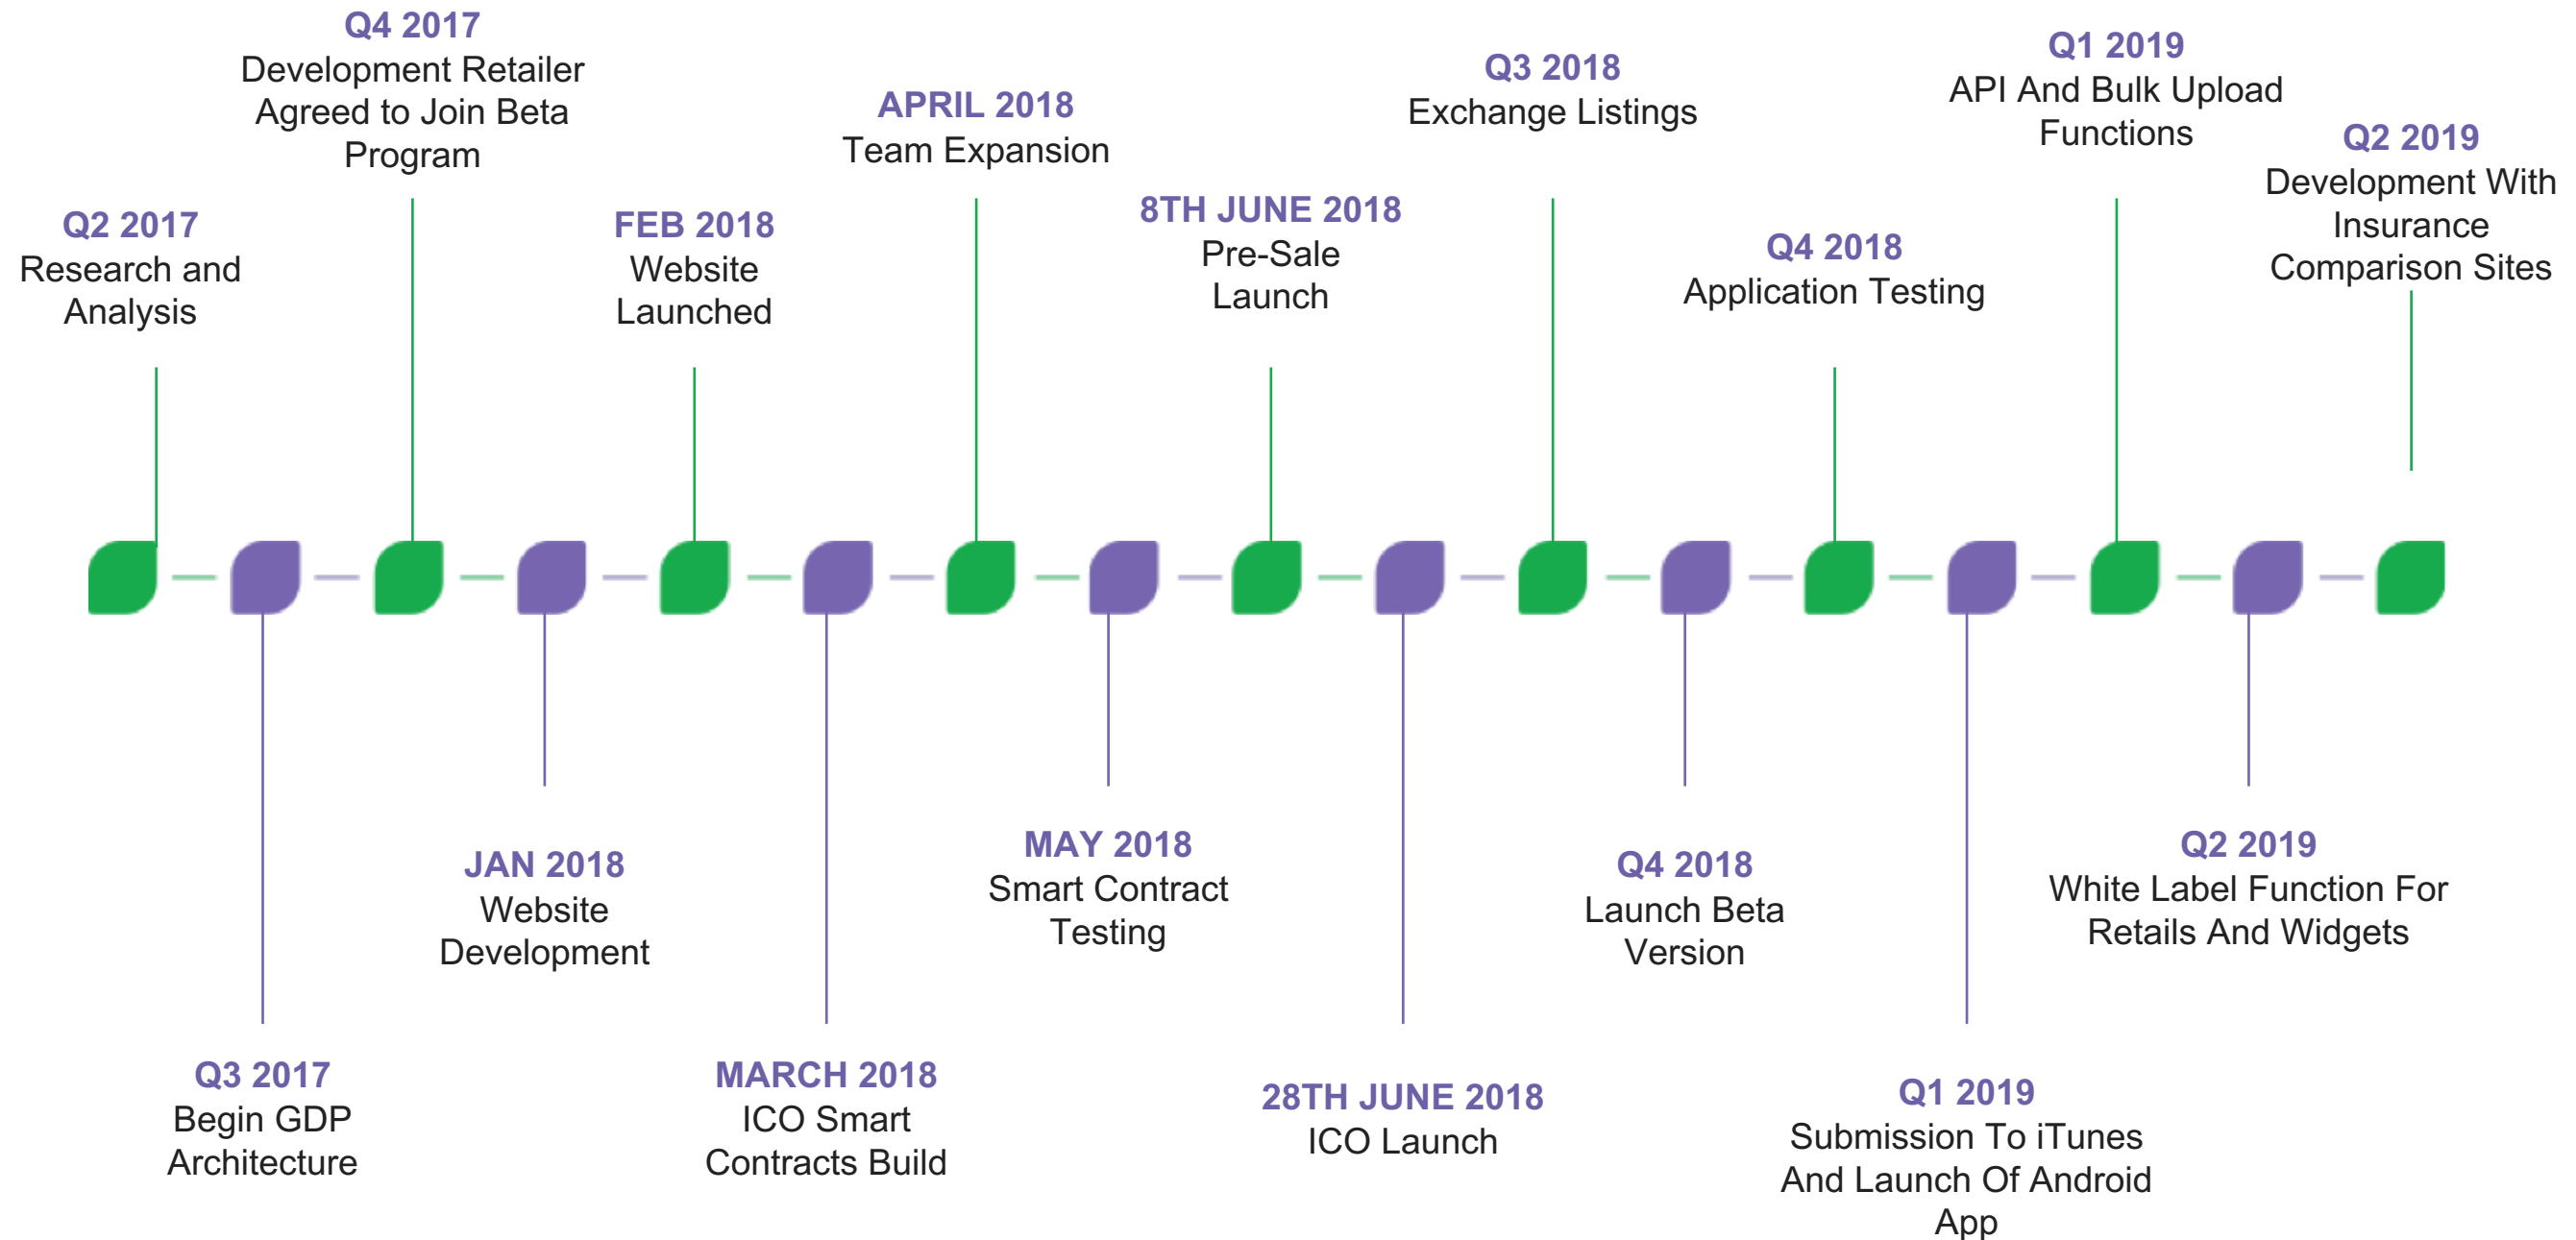

- ✓ Less Costly than Changing all Packaging
- ✓ No Internal Platform Maintenance Fee

## More Scalable

---

- ✓ Product / Market Language Agnostic Solution
- ✓ Interoperable with Third Party Apps

# Strategic Market Plan

# The Team

## Founders with Extensive FinTech Background

---

IAIN WILLIAMS

CEO / Co- Founder

Bringing a wealth of experience built from working with a multitude of FinTech startups. An investor with a talent for making things uncomplicated.

PAUL WILLIAMS

CEO / Co- Founder

A solid background working with a range of startups, including FinTech and financial products. A keen investor with a passion for new technologies.

# The Team

## Seasoned Blockchain Engineering

---

**TARAS TSARENKO**

Lead Technical Development

Taras brings over 9 years of innovation and experience having worked on projects such as NEM, ARK, Polymath, Networks and E/Capital. There could not be a more experienced and ideal technical lead for this project.

**IVAN SOLOMICHEV**

Blockchain Expert

Blockchain, Ethereum, Solidity Smart Contracts developer IOS dev with 5 years professional experience with published applications.

**DEVENDRA R**

Blockchain / Ethereum Expert

Official Contributor of Bitsend, Woked on STORJ and other IPFS storage. Ethereum, Hyperledger Fabric, DApps, Smart Contracts, Meteor JS.

# The Team

## Seasoned Blockchain Engineering

---

KASHYAP PRAJAPATI

Blockchain Team Lead

3+ years working with Blockchain, Ethereum dapp, Wallet, Solidity Smart Contracts, New Cryptocurrency, Cryptocurrency exchanges and smart contracts audits. 9+ years experience in JavaScript, Angular JS, MySQL, Postgres, MongoDB, Python, Docker as full stack developer.

ILESH MALANI

Blockchain Ethereum Developer

Official Contributor of Bitsend, Woked on STORJ and other IPFS storage. Ethereum, Hyperledger Fabric, DApps, Smart Contracts, Meteor JS.

# The Team

## Our Professional Team

---

AMANDA CASWELL

PR and Social Media

Advertising copywriter and blogger for a variety of brands and corporations including Nintendo, Pepsi, Unilever, Proctor & Gamble, Disney and more. She lives just outside NYC with her loving Husband and 2 adorable kids.

JACOB PARKER-BOWLES

Cyber Security & Financial Crime

An entrepreneurial leader and a visionary. With over 10 years of experience in the field, Jacob is well versed in the fields of cyber security and financial crime. He has a proven track record of successfully helping financial institutions protect their assets and plan for the future.

DANIEL HARBUZ

Head Marketing

8 Years of Business development with some of the largest brands in the world. Managed data and Special reports for the Guardian Newspaper. Advised and consulted with Partners and Managing directors at some of the Worlds largest firms such as Goldman Sachs and Deloitte.

# The Team

## Our Professional Team

---

DEEP JOHAL

Cyber Security & Financial Crime

Vast experience having raised \$20 million in the payment processing space. And a decentralised exchange raising \$4 million. Please update all photos as per attached. each photo is named correctly to match the profiles.

KHRYSTYNA MILIAK

Technical Project Manager

PM with 5 years of experience consulting on various project matters. Tracks time and budget, organises team.

# Money, Milestone

---

Total token supply: **100,000,000**

Total token supply for sale at ICO: **85%** (Team, Community & Growth **15%**)

Soft Cap: **1000 ETH**

Hard Cap: **35,000 ETH**

Pre-Sale	First 1000 ETH	1 ETH	1700 GDP + 40% Bonus
Stage 1	Next 5000 ETH	1 ETH	1700 GDP + 30% Bonus
Stage 2	Next 5000 ETH	1 ETH	1700 GDP + 20% Bonus
Stage 3	Next 5000 ETH	1 ETH	1700 GDP + 10% Bonus
